## PROFESSIONAL SUMMARY

---

Backend Developer with 1 year of production experience at TCS on American Express project. Expert in Java, Spring Boot, REST APIs, microservices, and cloud deployment. Proficient in SQL optimization, JWT security, CI/CD, and Kubernetes.

## TECHNICAL SKILLS

---

- Languages: Java, C/C++, SQL, JavaScript, HTML, CSS
- Backend: Spring Boot, REST APIs, Microservices, JWT, CI/CD
- Cloud & DevOps: AWS IoT Core, GKE, Terraform, Docker, MQTT
- Databases: MySQL, PostgreSQL, SQL Query Optimization, NoSQL
- Tools: Git, GitHub, Maven, Postman, SOLID, DSA, DBMS, OOP, Agile

## PROFESSIONAL EXPERIENCE

---

Backend Developer | TCS (American Express Project)

May 2025 – Present

- Engineered scalable REST APIs using Spring Boot serving production traffic for Fortune 500 financial client with zero downtime
- Implemented JWT authentication and token validation across microservice boundaries with role-based access control
- Optimized slow SQL queries through indexing and restructuring, reducing API response time by 35% (180ms → 117ms)
- Designed and maintained CI/CD pipelines using Git and automated testing to streamline build, test, and deployment processes
- Orchestrated microservices on Google Kubernetes Engine (GKE), managing containerized deployments and resource optimization for high-availability
- Managed infrastructure-as-code using Terraform for provisioning and version-controlled cloud resource deployment
- Participated in Agile ceremonies and code reviews

Developer Intern | IwayPlus, IIT Delhi

Jun 2024 – Aug 2024

- Developed full-stack website (Node.js + React) with zero downtime deployment and 99.9% uptime
- Designed RESTful APIs reducing manual data-entry by 25%
- Optimized page load performance (2.3s → 1.1s) and resolved production bugs

## PROJECTS

---

OnBoard - IoT Fleet Monitoring System | React.js | Node.js | SQL | AWS IoT Core | MQTT

- Processed live telemetry from 100+ devices via AWS IoT Core; engineered MQTT retry logic achieving 99%+ delivery
- Built interactive dashboards with sub-second refresh and optimized SQL queries for real-time performance
- Designed scalable REST API layer enabling independent autoscaling

RazorPay Clone | Spring Boot | PostgreSQL | JWT | REST APIs

- Developed a secure payment gateway backend inspired by Razorpay, enabling payment creation, transaction tracking, refunds, and merchant account management.
- Implemented JWT-based authentication and role-based authorization for merchants and administrators, ensuring secure access to financial operations.
- Designed scalable service-layer architecture using Spring Boot, JPA, and PostgreSQL with robust validation, exception handling, and audit logging.
- Optimized database performance using indexing and efficient query design, improving transaction retrieval and reporting efficiency.

## EDUCATION

---

B.Tech in Computer Science and Engineering | Maharaja Agrasen Institute of Technology (GGSIPU), Delhi | 2020 – 2024 | CGPA 8.40

Class XII (CBSE) | Salwan Public School, Uttar Pradesh | 2019 – 2020 | 88.6%

Class X (CBSE) | Konark Vidyapeeth Senior Secondary School, Uttar Pradesh | 2017 – 2018 | 80%
